Epsilon Tahari Version History

1.0.1   Added a Reverse Throttle checkbox. Fixed a problem with the fire key when keyboard is selected as input device. Added left/right/forward diagonal views for joysticks. A hat switch on the joystick can be configured as view direction selector by pressing the F8 key in the Input Setup screen. Note that not all joysticks are supported at this time for this feature.

1.0.2   Fixed problem where keyboard selection would revert to mouse input.
