

Mac OSX (Leopard) Installation Instructions

Release 1.1
30 September 2008

Introduction

This document describes what is required to install the InfoSlips Viewer on the Mac OSX (Leopard) operating system.

Process

Steps need to be performed:

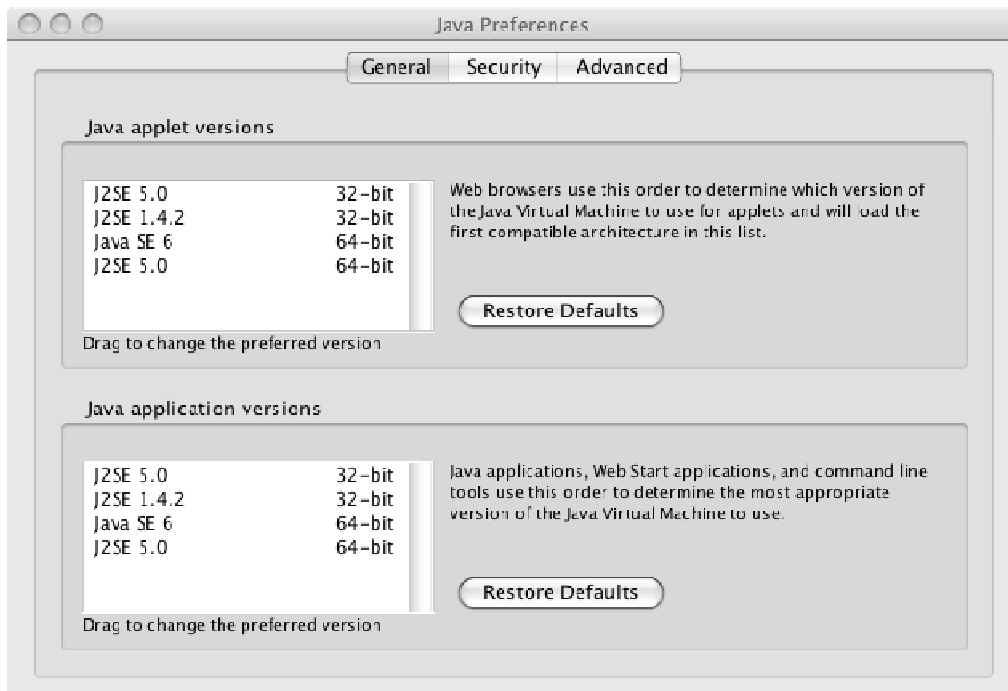

1. Upgrade Mac OS X to latest version: 10.5.5. (To find out what version of Mac OS X you have installed on your computer, choose Apple () > About This Mac. The attached screen shot will indicate the version we support)

2. After installation do a check for software updates. You should receive an update called: 'Java for Mac OS X 10.5 Update 2' You could also install this update manually by downloading it from the web
<http://www.apple.com/support/downloads/javaformacosx105update2.html>
3. After installing this update you need to go to:
Applications/Utilities/Java/Java preferences.
Here you should be able to sort the create order of the Java Runtime components. Select order as screen shot below:

If this has been done the environment is in place to install the InfoSlip Viewer. Use the steps below:

1. Copy the .dmg file to your machine.
2. Double click on the disk image file - it will be mounted automatically by Mac.
3. It will open up another Finder window that will show the installer in the disk image.
4. Double-click the installer and follow the installation instructions.
5. Click finish when done.
